IonSuite - PRODUCTION

CheckWay[™]

CheckWay software is designed for the 2200CW Series Checkweigher, with easy-to-use controls for managing product IDs from a desktop or portable device with internet access. Use CheckWay to manage one scale or control multiple lines - replacing manual entry to save time, improve quality control and deliver cost savings.

CHECKWAY PERFORMANCE FEATURES

Centralized control

Create a database of products that can be edited and assigned. Delete obsolete products and have visibility of what products are in each scale - or groups of scales.

Accessibility

CheckWay is browser-based, mobile compatible and accessible from any browser - cloud-based or install on premise with access from internal systems.

Scalable

Manage selected product IDs for one, all, or groups of scales. For a group of scales, create groups and assign what products are sent to each group.

Quality control

Ensure that product IDs are loaded properly in each scale to maintain correct checkweighing within set tolerances.

Avoid errors with manual entry

Prevent manual ID entry errors and prevent operator reconfiguration of product IDs management is in control. Can sync the scales to maintain quality control and consistency.

PERFORMANCE FEATURES AND FUNCTIONALITY

- Checkweigh limits
- Tare value
- · Locks in desired unit of measurement
- Two 40 alphanumeric character fields
- Accumulator and counter values for each product
- Motion aperture required to achieve a stable weigh

DORAN 2200CW SERIES SS CHECKWEIGHER

The 2200CW SS Series Checkweigher features an advanced weighing indicator with a large selection of options to make this versatile indicator a smart choice for a range of weighing applications. Options include base sizes, capacities, battery power, light tower, beepers, scanners, and communications including Ethernet, WiFi, Bluetooth and USB and networking equipment.

Designed for speed, durability, and versatility - featuring a responsive keypad, rugged stainless-steel construction and washdown protection with components built in the USA.

ionSuite™

- Threshold weight required to capture valid weight
- Three or five band checkweigh operation
- Checkweigh limit entry style
- Output configuration for external lights and relay

PART OF DORAN ionSuite™

Doran ionSuite[™] is a set of software applications designed for precise formulation, real-time data collection, and efficient production — to achieve pinpoint control of your plant floor. With innovative features and best-in-class performance, ionSuite[™] can lower costs, achieve plant-wide efficiencies and ensure employee accountability.
