DIMENSION SOFTWARE
Control and monitor indicators
from Windows-based computers
and mobile devices.

Dimension™

Dimension software is a real time-saver — and can give operators full control for managing indicator configurations on Doran indicators. View current settings and easily modify settings. Dimension is easy to install on Windows based PCs.

PERFORMANCE FEATURES AND FUNCTIONALITY

Configuration windows

Use setup screens, to view, change and send configurations to the indicator. Save configurations for future load settings and to match indicator configurations for future orders and support. Can also configure network settings and create custom data strings for data collection or output to barcode label printers.

File transfer window

Send longer command strings or complete files to the indicator: Enter the string in the supplied window or send a .txt file containing the commands to the indicator.

Terminal program

Communicate with any indicator to verify the data string and send remote commands. Test the configuration of network settings, verify network communication. Analyze any network communication to confirm commands and processed correctly. Echo feature allows to assess communication on Ethernet or WiFi, USB or RS232.

PERFORMANCE FEATURES AND FUNCTIONALITY

2200 Product IDs and Batching

Provides support for product ID, setpoint and batching: allows for creating a batch or managing a batch library (up to 100). Configure the setpoint target weight and setpoint operation.

SUPPORT FOR DORAN INDICATORS

7000XL SS Series

The 7000XL SS Series has a industrial design that acts as a defense against the damaging effects of shock, abuse, and other environmental factors. IP69K washdown protection with components that are built in the USA.

4300 SS Checkweigher Series

Designed for the most demanding environments, with a rugged industrial design, superior washdown protection, and simple operation with components that are built in the USA.

2200 SS Series

A complete weighing system to create a high-performance turnkey solution for a variety of applications. IP69K washdown protection with components that are built in the USA.

2200CW SS Checkweigher Series

Versatile system with advanced features to accurately hit product targets — improving quality control and achieving cost savings. The system features stainless steel construction and washdown protection with components that are built in the USA.

OPTIONAL USB CABLE FOR NETWORKING SETUP

Internal USB cable (WCB0261)

All Ethernet and WiFi cards have a USB port on the option board allowing for connections between the PC and scale indicator via USB for fast network connections.
