

Handrail Scale

KEY FEATURES

Accuracy, patient safety, and portability have all been engineered into the Doran DS7100 Handrail Scale. Because the scale only weighs 30 pounds, moving it from room to room takes very little effort. Simply tilt the scale back on the two built-in, non-marking wheels and roll to your destination.

As soon as the patient steps onto our well designed, low-profile DS7100 platform, an accurate weight up to 1,000 pounds will be held on the display. Doran's exclusive *Weight Lock* feature ensures an accurate weight is displayed regardless of a patient's movements. Our *Reweigh* functionality allows a second weight to be acquired while the patient remains on the platform.

After the patient has stepped off the platform, *Last Weight* allows the previous weight and BMI value to be recalled for later recording.

SPECIFICATIONS

Warranty:	Three Years
Power Input:	AC Adapter (Optional) 6 AA Batteries (Included)
Battery Life:	11,000 Weighments
Maximum Capacity:	1000 x 0.1 lb (454 x 0.05 kg)
Construction:	Aluminum and Painted Steel with Plastic Trim
Dimensions:	Overall Dimensions 25" W x 29" D x 46" H Platform Dimensions 22.5" W x 20.5" D x 2" H
Display:	1" High LCD
Displayed Units:	lb, kg, Units lock feature
Controls:	Zero, LB, KG, Last Weight, Reweigh, Scroll Up/Down and BMI
BMI Calculator:	Input data in FT/IN or CM
Options:	AC Adapter International Power Supply

DS7100-HR

The Model 7100-HR offers the same features of the 7100 Handrail Scale with the addition of an integrated height rod.
