

Handrail Scale

KEY FEATURES

The DS7200 Handrail Scale offers all the same features and benefits of the DS7100 Handrail Scale, but the unique feature of the DS7200 is the single handle or grab bar just below the digital weight indicator. This design is ideal for bariatric patients and also allows patients to step on and step off the scale from the sides.

Weighing only 30 lbs, little effort is needed to move the scale around your healthcare or extended care facility.

Tip the scale back on the two built-in, non-marking wheels and push the handrail scale to its new location. The large, low profile base has a non-skid surface.

For a busy hospital weighing a high volume of patients, Doran's Touchless Start feature acquires a patient's weight in as little as two seconds without any buttons to press. Simply have the patient step onto the DS7200 platform and an accurate weight up to 1,000 pounds will be held on the display. Doran's Weight Lock feature allows an accurate weight to be held regardless of any movement of the patient.

A second weight can be taken by pressing the Reweigh button on the scale's control panel while the patient is on the scale. Last Weight allows the previous weight and BMI value to be recalled after the patient has left the platform for later recording.

SPECIFICATIONS

Warranty:	Three Years
Power Input:	6 AA Batteries (Included)
Resolution Range:	0.1 lb
Units:	lb or kg
Output:	Bi-directional RS-232
Construction:	Aluminum and Painted Steel with Plastic Trim
Dimensions:	Scale Dimensions 25" W x 29" D x 46" H Platform Dimensions 22.5" W x 20.5" D x 2" H
Weight Capacity:	1000 lb
Options:	RS-232 Communications Port USB Communications Port AC Adapter
