

Portable Fold-up Wheelchair Scale

KEY FEATURES

The DS8030 offers a large, low profile base that makes weighing patients in wheelchairs fast and easy. The unit's platform is constructed of heavy gauge painted steel and is sheathed with a textured, heavy-duty composite plastic cover that provides an anti-skid surface for maximum safety. The molded seamless surface traps dust and debris and is very easy to clean.

Our exclusive *Weight Lock* feature ensures an accurate weight is displayed regardless of a patient's movements. *Reweigh* functionality allows a second weight to be acquired while the patient remains on the platform.

The scale's mobility is made easy by two large diameter wheels, concealed along one side. With a few twists of the mast locking handles, the DS8030 folds down to a compact size so it can easily be rolled through doorways and throughout your facility. The scale is can be safely and securely stored in its folded position thanks to the rubber stabilizer feet that are attached to the mast.

The DS8030 is EMR Ready and data can be transmitted via either the included USB or RS-232 ports.

SPECIFICATIONS

Warranty:	Three Years
Power Input:	AC Adapter (Included) 100-240VAC, 50/60HZ ULc, ULus, CE 6 AA batteries NOT included
Maximum Capacity:	800 lb x 0.2 lb (360 kg x 0.1 kg)
