

# Diaper or Specimen Scale

## KEY FEATURES

Compact and portable, the Doran PC-400 is constructed entirely out of stainless steel for easy-to-clean, durable performance. The unit features our field-proven, exclusive *Quad-Spring* shockproof base design that virtually eliminates damage from shock or overload.

You have a choice on power – use the included AC plug-in adapter or the internal rechargeable battery for total portability. The battery recharges in less than four hours with the AC adapter but you can continue to use the scale during that time. The *Auto Shut-Off* feature maximizes battery life.

Extremely precise, the large LCD read-out displays weight in as fine as a 0.1 gram.

## SPECIFICATIONS
