

DS7060-ADA AND DS9100-ADA
CERTIFIED FOR ADA COMPLIANCE

Improve patient care
with accurate, accessible
weighing solutions.

Handrail Scale

KEY FEATURES

Certified for ADA compliance, the DS7060-ADA combines accessible design, patient stability, and clinical-grade accuracy in a durable digital handrail scale. It features an edge-to-edge slip-resistant platform and dual supports constructed from welded tubular steel.

With an 800-pound capacity, the DS7060-ADA accommodates a wide range of patients, while sturdy handrails and wide gripping surfaces provide additional stability during weighing.

Doran’s exclusive Average Hold feature averages multiple weight readings to help obtain an accurate result when a patient has difficulty remaining still. Stable Hold, Reweigh, BMI, and Units Lock further support efficient clinical workflows.

EMR-Approved USB and RS-232 communication ports support validated data transfer, while optional Wi-Fi connectivity expands integration possibilities. Built-in wheels make the scale easier to relocate, and large-diameter foot pads provide stability once positioned.

DS7060-ADA: Certified to comply with ADA technical requirements, specifically the U.S. Access Board’s Accessibility Standards for Medical Diagnostic Equipment used by patients in a standing position (MDE M304).

SPECIFICATIONS

Warranty:	Three Years
Power Input:	AC Adapter (Included) 100-240VAC, 50/60HZ ULc, ULus, CE or 6 AA batteries NOT included
Battery Life:	20,000 Weighments
Weight Capacity:	800 x 0.2 lb (360 x 0.01 kg)
Construction:	Painted Steel with Plastic Indicator
Dimensions:	Scale Dimensions 26" W x 26" D x 50" H Platform Dimensions 25" W x 25" D x 2.76" H
Display:	1" Tall LCD
Displayed Units:	lb, kg, Units Lock feature
Controls:	Units, Reweigh, BMI, Zero, and Scroll Up/Down
BMI Calculator:	Input data in FT/IN or CM
Communications:	EMR-Approved RS-232 and USB Standard, WiFi (Optional)
Options:	International Power Supply RS232 Communications Cable USB Communications Cable WiFi Communications

DS7060-HR-ADA

Model DS7060-HR-ADA offers the same features of the DS7060-ADA Handrail Scale with the addition of a DS1150 Height Rod.

DS9100-ADA: Certified to comply with ADA technical requirements, specifically the U.S. Access Board's Accessibility Standards for Medical Diagnostic Equipment used by patients seated in a wheelchair (MDE M303).

KEY FEATURES

Certified for ADA compliance, the DS9100-ADA combines accessibility and clinical accuracy in a durable wheelchair scale designed for high-traffic healthcare environments. Its extra-wide, low-profile platform and two gently sloped ramps provide convenient pass-through entry and exit.

A 1,000-pound capacity accommodates the combined weight of patients and their wheelchairs or mobility devices. Adjustable tare removes the wheelchair weight and displays the patient's net weight directly on the indicator.

Average Hold, Stable Hold, Reweigh, BMI, and Units Lock help clinicians obtain and manage accurate measurements efficiently.

The DS9100-ADA is the only ADA-compliant scale with a folding design and rotating indicator. Four sturdy casters allow staff to relocate or store the scale when needed, and hydraulic-assisted opening makes setup easier. EMR-Approved USB and RS-232 connectivity and optional Wi-Fi support integration with electronic medical record systems.

Wheelchair Scale

SPECIFICATIONS

Warranty:	Three Years
Power Input:	AC Adapter (Included) 100-240VAC, 50/60HZ ULc, ULus, CE 6 AA batteries NOT included
Battery Life:	20,000 Weighments
Weight Capacity:	1000 x 0.1 lb (454 x 0.05 kg)
Construction:	Aluminum and Painted Steel with Plastic Indicator
Dimensions:	Resting on Feet Weighing Platform 40.1" W x 36.1" D x 2.5" H Two Ramps Extended 80.75" W x 45.3" D x 46.7" H Two Ramps Folded 43.8" W x 45.3" D x 46.7" H Transport and Storage Ramps and Column Folded Standing on Casters 43.8" W x 15.7" D x 45.3" H
Display:	1" High LCD 180-degree Indicator Rotation
Displayed Units:	lb, kg, Units Lock feature
Controls:	Units, Reweigh, BMI, Zero, and Scroll Up/Down
Communications:	EMR-Approved RS-232 and USB Standard, WiFi (Optional)
Options:	International Power Supply RS232 Communications Cable USB Communications Cable WiFi Communications

Better care without compromise.

Accurate weighing is essential to quality patient care. Using Medical Diagnostic Equipment (MDE) accessibility standards, Doran adapted the established DS7060 and DS9100 platforms to better accommodate disabled patients. The resulting DS7060-ADA and DS9100-ADA scales are certified for ADA compliance by an independent third-party, WCL Consulting Co.

For many healthcare providers, meeting these needs is also a regulatory responsibility. Public and private healthcare entities that receive federal funding, including Medicare and Medicaid, must meet applicable accessibility requirements. Facilities that do not receive federal funding may still have obligations under Title III of the ADA. Understanding these requirements and selecting appropriate equipment can help providers deliver better patient care while addressing their regulatory responsibilities.

COMPLIANCE AND DATA

- **EMR Approved** – Doran's designation indicating that a scale and its integration have been fully developed, rigorously tested, and verified to provide seamless, secure communication with more Electronic Medical Record (EMR) systems than competing solutions.
- **Validated Data Transfer** – USB and RS-232 ports are standard, with optional Wi-Fi communication.
- **BMI** – Provides instant BMI calculations with EMR capabilities.

CLINICAL USE

- **Average Hold** – Doran's exclusive feature for patients who have difficulty remaining still. The scale averages multiple weight readings during movement to determine an accurate weight.
- **Stable Hold** – Indicates when a stable weight has been achieved and holds the reading on the display.
- **Reweigh** – Allows a second weight to be obtained while the patient remains on the platform.
- **Units Lock** – Locks the scale to either lbs or kgs, helping prevent an accidental button press from changing the unit of measurement.

BUILT FOR CLINICAL ENVIRONMENTS

- **Space-Saving Mobility** – Sturdy wheels allow the scale to be relocated quickly and easily.
- **Cleaner Friendly** – Designed to withstand cleaning agents commonly used in medical environments, including bleach, hydrogen peroxide, and alcohol.
- **Power Supply Options** – Operates on AC power or batteries; AC adapter included.

Have questions about ADA compliance for your facility?

Meeting accessibility requirements is critical for healthcare facilities, and determining how they apply to your practice can be complex. Doran's knowledgeable customer service team understands the equipment considerations involved and is ready to help you evaluate your needs. Our exclusive solutions can help you meet your facility's ADA requirements.
